On-Page SEO Results

Your On-Page SEO could be better

Your page has some level of On-Page SEO optimisation but could be improved further. On-Page SEO is important to ensure Search Engines can understand your content appropriately and help it rank for relevant keywords. You should ensure that HTML Tag Content is completed correctly and align text content to target keywords.

Title Tag

You have a Title Tag of optimal length (between 50 and 60 characters).

COMSATSPrepHub — Prepare Smarter for COMSATS Exams

Length : 50

Meta Description Tag

Your page has a Meta Description Tag however, your Meta Description should ideally be between 120 and 160 characters (including spaces).

Access verified past papers, practice quizzes, and performance analytics for COMSATS University students.

Length : 105

A Meta Description is important for search engines to understand the content of your page, and is often shown as the description text blurb in search results.

SERP Snippet Preview

This illustrates how your page may appear in Search Results. Note, this is intended as a guide and Search Engines are more frequently generating this content dynamically.

Amount of Content

Your page has a low volume of text content which search engines can interpret as 'thin content'.

Word Count: 333

It has been well researched that higher text content volumes are related to better ranking ability in general.

Image Alt Attributes

You have images on your page that are missing Alt Attributes.

We found 7 images on your page and 5 of them are missing the attribute.

Alt Attributes are an often overlooked and simple way to signal to Search Engines what an image is about, and help it rank in image search results.

Canonical Tag

Your page is not using the Canonical Tag.

The Canonical Tag tells Search Engines the primary URL of a page. Google recommends all pages specify a Canonical.

Noindex Tag Test

Your page is not using the Noindex Tag which prevents indexing.

Noindex Header Test

Your page is not using the Noindex Header which prevents indexing.

SSL Enabled

Your website has SSL enabled.

HTTPS Redirect

Your page successfully redirects to a HTTPS (SSL secure) version.

Robots.txt

We have not detected or been able to retrieve a robots.txt file successfully.

A robots.txt file is recommended as it can provide important instructions to a search engine for how to most appropriately crawl your website as well as site areas that should be ignored.

Blocked by Robots.txt

Your page does not appear to be blocked by robots.txt.

XML Sitemaps

We have not detected or been able to retrieve an XML Sitemaps File successfully.

Sitemaps are recommended to ensure that search engines can intelligently crawl all of your pages.

Analytics

Your page is using an analytics tool.

 Google Analytics

Schema.org Structured Data

We have not detected any usage of Schema.org on your page.

Schema.org is a structured data markup for webpages which helps Search Engines understand your site better and provide rich snippets directly in their search results.

Generative Engine Optimisation (GEO)

Your Generative Engine Optimisation needs improvement.

Your page is not well positioned for Generative Engine Optimisation (GEO). GEO is important to ensure LLMs and AI Search Engines can effectively crawl your content and understand the underlying entity structure. Consider additional enhancements or you may be missing out on traffic from LLMs which are rapidly growing as a traffic source.

Identity Schema

No Organisation or Person Schema identified on the page.

The absence of Organisation or Person Schema can make it harder for Search Engines and LLMs to identify the ownership of a website and confidently answer brand, company or person queries.

Rendered Content (LLM Readability)

Your page has a high level of rendering (changes to the HTML).

Rendering Percentage: 60%

Dynamically rendering a lot of page content risks some important information being missed by LLMs that generally do not read this content.

llms.txt

We have not detected or been able to retrieve a llms.txt file successfully.

Links

Backlink Summary

You have a reasonably weak level of backlink activity to this page.

Search Engines use backlinks as a strong indicator of a page's authority, relevance and ranking potential. There are various strategies available to gain links to a page to improve this factor

Friendly Links

Some of your link URLs do not appear friendly to humans or search engines.

We would recommend making URLs as readable as possible by reducing length, file names, code strings and special characters.

Usability

Your usability is good

Your page is mostly usable across devices. Usability is important to maximise your available audience and minimise user bounce rates (which can indirectly affect your search engine rankings).

Device Rendering

This check visually demonstrates how your page renders on different devices. It is important that your page is optimised for mobile and tablet experiences as today the majority of web traffic comes from these sources.

i

Google's Core Web Vitals

Google is indicating that they do not have 'sufficient real-world speed data for this page' in order to make a Core Web Vitals assessment. This can occur for smaller websites or those that are not crawl-able by Google.

i

Use of Mobile Viewports

Your page specifies a Viewport matching the device's size, allowing it to render appropriately across devices.

Google's PageSpeed Insights - Mobile

Google is indicating that your page is scoring poorly on their Mobile PageSpeed Insights evaluation.

Note that this evaluation is being performed from US servers and the results may differ slightly from an evaluation carried out from Google's PageSpeed Web Interface as that reporting localises to the region in which you are running the report.

Google has indicated that the performance of a webpage is becoming more important from a user and subsequently ranking perspective.
